Dulles, Va.

FOREWORD

*A*MONG the world's most notable examples of Architecture will be found many splendid buildings enriched through the use of Stamped Sheet Metal Ornaments and Statuary, the beauty and permanence of which have been well established.

We specialize in the production of Ornaments from the original details of the most exacting Architects and have modern manufacturing facilities for this purpose. We will be pleased to submit estimates upon receipt of particulars.

In presenting this latest edition of our Catalog of Architectural Sheet Metal Ornaments we stress the fact that all illustrations in it are half tone engravings made directly from photographs of the finished product.

Prices quoted are for Ornaments of Sheet Zinc, in parts unless stated otherwise, f.o.b. our factory and a substantial stock is carried so that prompt shipments can be made.

Many of the Ornaments shown are carried in stock of copper, some in aluminum, bronze, lead coated copper, hardlead and other alloys, or can be made up on short notice. Due to the wide fluctuation in cost of these metals no prices can be listed, but quotations will be made promptly upon receipt of information as to quantity wanted.

Our modelers are continually creating new designs and new sizes of those illustrated. If you do not find what you require in this catalog we will appreciate your inquiry.

In filling orders from patrons unknown to us, who do not furnish references with the order or have not a favorable commercial rating, shipment will be made C.O.D.

Order by number and give shipping directions as all shipments will be made by express unless otherwise instructed.

SHEET METAL SPANDRELS AND STATUES

Spandrels of sheet metals have distinct advantages in lightness and durability, and are being used extensively as a decorative feature on modern buildings throughout the country. Through the wide selection of color effects available in sheet metals, desirable contrast with adjacent materials can be obtained.

Our years of experience with the requirements of Architects and the Trade and our continued effort to modernize our manufacturing equipment and processes have made it possible for us to furnish spandrels and other large ornaments of copper, bronze, leaded copper, aluminum, hardlead, chromium steel and other alloys for many prominent buildings.

A Spandrel 46" wide, 58" high, of 20-ounce sheet copper.

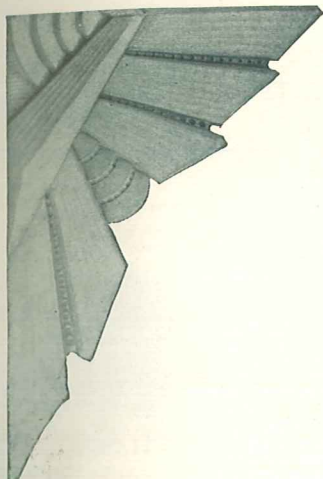

A Statue stamped of 32-ounce sheet copper.

Statues and other large figures stamped of sheet metal faithfully reproduced from the original models.

We specialize in the fabrication of architect's original designs and will be pleased to submit estimates upon receipt of particulars.
